Making The Choice That is Right For You or Your Family Member

Be Prepared

Your Long Term Care Ombudsman or your Aging and Disability Resource Center can help you understand the different types of facilities available, and the different funding requirements and options for paying for care. After having decided which type of home would best suit your needs, you should make arrangements to visit the choices in your area. You may want to ask that any available written information such as price lists, mission statements, available services and admission agreements be sent to you ahead of time to help you prepare your questions and have time to read the fine print. Before or during your visit you might review inspection reports (or surveys), which can be found online or prominently posted in the home. Take time to write down the top two or three services or issues that are most important to you as you make this choice.

Visit the Homes that You Have Identified as Your Choices and Ask Questions

The following questions to ask and things to consider may help you identify whether a home and the services it provides can meet the needs and preferences of you or your loved one. This checklist is designed to provide a comparison between two homes but you should visit as many homes as you think will help you make the best choice. A Long Term Care Ombudsman can help answer any other questions you might have about regulations or licensing, or to clarify things you may have seen or heard during your tours.

During your tour ask questions about the home and how its care is organized; ask about its reputation in the community and what the people that live there say about the care provided. Notice whether the person who gives you the tour asks about the needs and preferences of you or your loved one. Ask yourself if you are satisfied with her or his answers. Finally, think about making a second, unscheduled visit, on a different day, possibly during a meal or social program. This will help you to see for yourself how well the home organizes these important times of the day, allowing you to observe how skilled and welcoming the staff are, and most importantly, how content the people who live there seem to be.

As You Make Your Decision ...

Compare your notes and decide whether the homes that you visited can fulfill those top two or three priorities that you identified. Be sure you are comfortable that the home can provide the care you or your loved one needs. Be sure to get any assurances about how care is paid for in writing, if the need for future funding assistance is a concern. Finally, you should take the time to carefully and completely read all of the documents that you or your loved one will be asked to sign when moving in. You may also want to ask an attorney or another trusted person to review these documents with you.

Use Your Voice

If you or your loved one have questions at any time about the care and services provided, or if you feel dissatisfied with the conditions in the home, please call your Long Term Care Ombudsman. The Ombudsman is there to assist you in getting the care that you need and expect, and works to educate staff, residents/tenants and family members about long term care systems.

Most homes welcome families and other visitors into the home and should be receptive to issues being brought to their attention. Programs like the Long Term Care Ombudsman provide advocacy services to long term care consumers and work with homes to improve care and solve problems through careful planning and with input from groups like resident/tenant and family councils.
